## Drugs prohibited for use in horses intended for human consumption

**Ingredient Name:** phenylbutazone  
**Trade Names:** Phenylzone (Schering), Bute Tabs (Vedco), Phenylbute (Phoenix Pharmaceutical)

- Phenylbutazone (commonly referred to as "bute") is currently approved only for oral and injectable use in dogs and horses. Use in horses is limited to use in horses not intended for food. There are currently no approved uses of phenylbutazone in food-producing animals.
